

ESOS Energy Audits – 5 Organisations

The Client

LGEnergy Group contracted John Mulholland of Mulholland Energy to conduct Phase 1 ESOS Energy Audits in 2015 for a number of their clients including Alfa Laval, Logtek, Schoeller Allibert, Geo Speciality Chemicals and Mothercare.

The Challenge

The challenge was to conduct a total of 18 compliant ESOS Energy Audits over a range of sectors including engineering, chemical production, manufacturing, retail, transport distribution centres and offices against ESOS deadlines.

The project involved:

- Contacting the client and securing energy and other data
- Conducting on-site audits
- Analysis data
- Writing compliant reports to ISO 50002
- LGEnergy Group acted as the Lead Assessor for each client.

The Results

The submitted ESOS Energy Audit Reports were to the full satisfaction of each client. Because of the compliance deadline of 5 December 2015, then the timing was crucial to comply with Environment Agency requirements. Each report identified a number of no cost, low cost and higher cost measures with implementation costs and paybacks.

The Reaction

In 2015 LGEnergy Group appointed John Mulholland to this ESOS work because we were familiar with the quality of his work across a number of sectors and his extensive experience in over 40 years in the field. Although John was a qualified ESOS Lead Assessor, we needed him in the role of auditor.

John worked to a very high standard and had the capacity and ability to work across multiple sectors for five of our clients to tight deadlines. John was reliable, worked professionally and required minimum supervision. The quality of his ESOS audit reports, analysis and recommendations exceeded our clients' expectations and were second to none.

He also related to our clients in a personable and professional manner and we expect him to be called upon to do repeat work in ESOS Phase 2. Our clients were extremely happy with John's services as was LGEnergy Group.

Raymond Yeng - Head of Consultancy - LGEnergy Group
